Ward location
Description

Bramley and Ravenfield ward lies in the north east of the borough, with a population of 8,476 (2021 census). The ward is represented by two members of the Council. The ward covers a large rural area but most people live in the Bramley area along with Ravenfield Common. North of the main residential area the ward is rural with the villages of Hooton Roberts and Ravenfield set in open countryside including part of Thrybergh Country Park. To the east of Bramley, the ward borders junction one of the M18 motorway. Bramley and Ravenfield ward is served by three parish councils including the North and South wards of Bramley Parish (total population 6,965) Council and the whole of both Hooton Roberts (population 173) and Ravenfield (population 2,816) parish councils.

DATA REFRESHED: 1 FEBRUARY 2024

Rotherham Data Hub

Rotherham context

Rotherham is one of four metropolitan boroughs in South Yorkshire. It is divided into 25 wards covering a wide range of urban, suburban and rural areas. Rotherham's population of 266,200 (Census 2021) mostly live in urban areas, however 70% of Rotherham Borough is open countryside.

The 25 ward profiles contain data from a range of sources to enable a greater understanding of the individual local areas. The documents are available as a downloadable and printer friendly version (pdf.) and also via the online interactive tool located within the 'Community and Neighbourhoods' section of the Rotherham Data Hub - www.rotherham.gov.uk/data

The information is divided up into a number of sections, containing data relating to topic areas such as demographics, education, and health and wellbeing.
Section number	Contents
1: DEMOGRAPHICS	Information on the population make up of the ward, including age breakdown, ethnicity and religion (Census 2021)
2: HOUSING & HOUSEHOLDS	Information on housing tenure, types of dwellings and household composition and size (Census 2021)
3: EMPLOYMENT & CLAIMANT COUNT	Data on unemployment claimants aged 16-64 and types of employment within the ward
4: HEALTH & WELLBEING	General health and disability data (Census 2021). Data on life expectancy, death rates and weight measurements of children
5: EDUCATION	Highest level of education (Census 2021). The KS2 and KS4 education outcomes for children
6: DEPRIVATION	Information on the overall IMD rank and two of its subsets
7: COMMUNITY ASSETS	Map showing the location and number of community assets located in (or near) the ward
8: ENVIRONMENT	Information on accessibility to open and green space in the ward (according to the Green Space Index 2023)
9. CRIME	Data showing recorded crime and anti-social behaviour statistics for the ward

Unemployment Claimant Count measures the number of people claiming unemployment-related benefits, such as jobseeker's allowance or universal credit claimants.
Whilst it does not represent all of those that are out of work (as some people who are not working will not be claiming any benefits) it provides a useful indication of unemployment levels and the state of the local labour market.
Claimant count July 2023

| 6960	80
Rotherham	Ward

Key findings

In Bramley & Ravenfield ward the total claimant count in July 2023 is 80, which is 1.7% of the working age population. This is lower than the Rotherham average where the claimant count is 4.3% of the working age population.

Limitations on day to day activities for disabled residents in the ward

● Limited a little ● Limited a lot

8.5 (44.7%)   10.5 (55.3%)

The definition of disability in Census 2021 was: People who assessed their day to day activities as limited by long-term physical or mental health conditions of illnesses are considered disabled. Thus definition of a disabled person meets the harmonised standard for measuring disability and is in line with the Equality Act (2010).

Life expectancy at birth is the average number of years a person living in a particular area would expect to live based on modern mortality rates in that area. It is a measure of the average length of life and the the best overarching indicator of the health of the population.

Liife expectancy in Rotherham is lower than the national average for men and women. Life expectancy can be impacted by a number of factors and in Rotherham lower life expectancy rates are driven by premature deaths due to respiratory diseases, causes considered preventable and circulatory diseases.

Causes of death - stroke

Rotherham Data Hub

The deaths from stroke (all ages) measure allows comparison of the number of deaths from stroke for each ward and the England and Rotherham average. The measure gives an indication of the overall stroke burden on the population and reflects both the incidence of disease and the ability to treat it.

These statistics use a standardised mortality ratio (SMR) which describes whether a specific population are more, less or equally as likely to die than a standard population.
A SMR of:
• Less than 100 indicates fewer than expected deaths
• Equal to 100 indicates observed deaths is the same as is expected
• More than 100 indicates excess deaths

In England, Key Stage 2 (KS2) is the term used to refer to the second stage of a child's primary education. It includes the class years 3, 4, 5 and 6. Children are typically aged between 7 and 11 years old in KS2.

At the end of KS2 (Y6) children are assessed in Reading, Writing, Grammar Punctuation and Spelling, Maths and Science with a combination of tests and teacher assessments. To be regarded as 'Secondary Ready' children need to achieve the following:

- Achieve at least the expected standard in the Reading test
- Be deemed to have achieved at least the expected standard in Writing by teacher assessment
- Achieve at least the expected standard in the maths test.

This measure is referred to as reaching at least the expected standard in Reading, Writing and Maths,

Key findings

For Bramley & Ravenfield ward in 2023, there was a total of 107 pupils at the end of key stage 2, of which 0% were disadvantaged compared to 54.5% for Rotherham overall. The percentage of pupils in the ward achieving the expected standard in Reading, Writing and Maths was 51.4%, compared to 54.5% in Rotherham and 59% nationally.

During Key Stage 4 (KS4) most pupils work towards national qualifications - usually GCSEs. The compulsory national curriculum subjects ate the 'core' (English, maths and science) and 'foundation' (computing, physical education and citizenship) subjects.

Schools must also offer at least one subject from each of these areas: arts, design & technology, humanities and modern foreign languages.

Attainment 8 is a way of measuring how well pupils do in KS4 across a selection of 8 subjects including English and maths, plus:
- 3 subjects from qualifications that count towards the English Baccalaureate such as sciences, language and history
- 3 further GCSE qualifications or technical awards from a list approved from the Department for Education.

Each grade a pupil gets is assigned a points score from 9 (the highest) to 1 (the lowest). Each pupil's Attainment 8 score is calculated by adding up the points from their 8 subjects, with English and maths counted twice and are rounded to 1 decimal place.

Index of Deprivation

Rotherham Data Hub

The **Index of Multiple Deprivation (IMD)** is a Government index measuring deprivation at a local area level for all areas in England. It provides an understanding of relative deprivation across three different dimensions:
- Overall deprivation
- Deprivation affecting children, and;
- Deprivation affecting older people.

The most recent (2019) index uses 37 indicators across 7 deprivation domains (themes) with a 2013/14 baseline. These domains are:
- Income
- Employment
- Education, Skills & Training
- Health & Disability
- Crime
- Barriers to Housing and Services and;
- Living Environment.

IMD ranks small areas from most deprived to least deprived and divides them into 10 equal groups (deciles). Decile 1 represents the most deprived 10% and decile 10 represents the least deprived 10% in England.

The IMD is not produced at a ward level, for the purposes of these ward profiles scores have been aggregated to calculate ward deprivation rankings.

Narrative

Bramley & Ravenfield ward has a rank of 22 out of 25 wards in Rotherham and is in Decile 6. Of the 25 wards in Rotherham, 5 are in the top 20% most deprived in the country (deciles 1 and 2). The top 3 most deprived wards in Rotherham are Rotherham East, Dalton & Thrybergh and Maltby East.

Index of Deprivation Decile at LSOA

Rotherham Data Hub

Average IMD Super Output Area rank and score

The IMD is not published for wards, but the average SOA score in Bramley & Ravenfield ward in 2019 was 15 (12 in 2015), well below the Rotherham average score of 29 (28 in 2015), with an SOA equivalent rank of 19,458 (59th percentile).
Deprivation in the ward

Deprivation in Bramley & Ravenfield ward is well below the borough average and in most of the ward is also well below the national average. There are no neighbourhoods that fall within the most deprived 10% of England.

Deprivation rank
- 🟢 Average deprived 40-60%
- 🔵 Least deprived 60-100%

LSOA code (2011)	LSOA Local Name	IMD Score 2019 ▼	IMD Score 2015	IMD Rank 2019	IMD Rank 2015	IMD Decile 2019	IMD Decile 2015
E01007681	Bramley Grange	19.13	17.53	15130	16295	5	5
E01007684	Bramley South West	14.44	13.20	19506	20464	6	7
E01007692	Ravenfield	16.18	12.93	17776	20746	6	7
E01007683	Bramley North	13.04	12.38	21013	21364	7	7
E01007689	Bramley South East	14.69	11.50	19241	22378	6	7
E01007691	Ravenfield Common	10.35	6.89	24079	28115	8	9

The **Index of Multiple Deprivation (IMD)** combines information from the seven domains to produce an overall relative measure of deprivation. In addition to the overall deprivation measure, there are two supplementary measures:
- The **Income Deprivation Affecting Children Index (IDACI)** which measures the proportion of all children aged 0-15 living in income deprived families
- The **Income Deprivation Affecting Older People Index (IDAOPI**) which measures the proportion of all those aged 60 or over who experience income deprivation.

Both of these measures are absolute measures, based on the proportion of income deprived households in that area.

The IMD is not produced at a ward level, for the purposes of these ward profiles scores have been aggregated to calculate ward deprivation rankings.

Number of people in the ward not within a 10 minute walk of green space

1125

Square metres of green space in the ward per person

16.18

Does the ward meet the Green Space Index minimum standard of green space per individual?

No

The availability of open green spaces within a close walking distance is critical since it supports physical activity and encourages us to engage in regular exercise.

The source of the data contained within this section is the Green Space Index 2023, which is commissioned by The Ordinance Survey and undertaken by Fields in Trust on their behalf.

For more information, please visit www.fieldsintrust.org/green-space-index

Levels of crime in the ward
