

Mock Interviews

RMBC Repairs and Maintenance Case Study

Overview

ENGIE are committed to delivering Social Value in communities where we are contractually working.

Kerri White from ENGIE conducted 5 Mock interviews with students for RNN construction students.

The mock interviews were held for students looking to progress into an apprenticeship into the world of work. They were asked competency based interview questions and provided feedback on performance and ways to improve answers.

This was the students first encounter with an employer and a unique experience to break down the barriers and boost personal confidence.

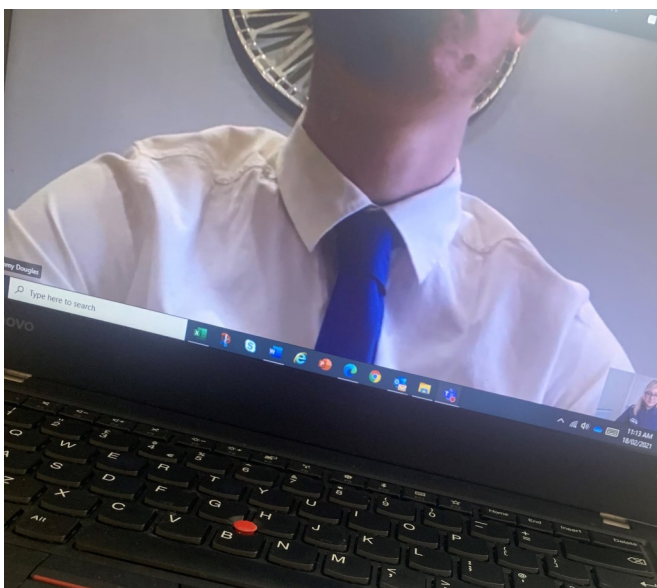

Outcomes

The aim of a mock interview is to help you learn how to answer difficult questions, develop interview strategies, improve your communication skills, and reduce your stress before an actual job interview.

Key Features

- To provide honest feedback on interview performance.
- Hints and tips for interview success.
- To engage and inspire students by providing advice on employability skills and job roles.

“It All the students who took part had never had a interview before, they all really benefited from the feed back and have gained in confidence.”

Kerri White
Social Value Officer
