

# Virtual Pathways Workshop

## RMBC—Repairs and Maintenance Case Study

### Overview

**ENGIE are committed to delivering Social Value in communities where we are contractually working.**

Kerri White from ENGIE hosted a Virtual interactive Pathways routes into construction with guest speaker Assistant Social Value Manager Dale Powell for RNN construction students..

Social Value Assistant Manager Dale Powell presented a power point presentation in the aim of raising aspirations of the attendees and opening up the doors to career pathways and opportunities.

The engagement event provided the opportunity for young people to find out more about the construction industry and the variety of roles available and to learn about what employers want and ways of finding jobs.

The event overall was a success with young individuals asking numerous questions regarding job roles: how to access the world of construction, what skills are required, how to source opportunities . It was great to have open and flowing conversations and providing expert advice from Dale.

### Outcomes

- Guidance on careers pathways and role specific information
- Qualifications and Entry requirements.
- Help and advice on starting a career in construction

*“It was great to discuss Pathways and opportunities accessible for the individuals on the call – just by being on the sessions they have opened that door ever so slightly and will be on the first steps to hopefully a long and fruitful career”.*
