Background

1. Neighbourhood Plans have to conform with the 'strategic priorities' of the relevant local plan. The National Planning Policy Framework (NPPF) indicates that strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses (paragraph 11). Paragraph 20 goes on to state that strategic policies should set out an overall strategy for the pattern, scale and quality of development, and make sufficient provision for:
 - housing (including affordable housing), employment, retail, leisure and other
 - commercial development;
 - infrastructure for transport, telecommunications, security, waste management,
 - water supply, wastewater, flood risk and coastal change management, and the
 - provision of minerals and energy (including heat);
 - community facilities (such as health, education and cultural infrastructure); and
 - conservation and enhancement of the natural, built and historic environment, including landscapes and green infrastructure, and planning measures to address climate change mitigation and adaptation.
2. NPPF then makes clear that "Plans should make explicit which policies are strategic policies" (paragraph 21). This document provides an assessment of Rotherham's Local Plan policies to identify those which should be considered as 'strategic policies' for the purposes of neighbourhood planning.

Assessment approach

3. The assessment has been undertaken for policies in the:
 - Rotherham Local Plan: Core Strategy 2013-2028, adopted in 2014;
 - Rotherham Local Plan: Sites and Policies document, adopted in June 2018; and
 - Barnsley, Doncaster and Rotherham Joint Waste Plan, adopted in 2012.
4. The assessment is provided in three tables:
 - Table 1: Assessment of Core Strategy (page 7)
 - Table 2: Assessment of Sites and Policies document (page 15)
 - Table 3: Assessment of Joint Waste Plan (page 30)
5. The assessment has had regard to the NPPF and PPG. In particular Neighbourhood Planning paragraph 076¹ of the PPG sets out useful considerations for reaching a view on whether a policy is a 'strategic policy'. Namely:
 - whether the policy sets out an overarching direction or objective;
 - whether the policy seeks to shape the broad characteristics of development;
 - the scale at which the policy is intended to operate;
 - whether the policy sets a framework for decisions on how competing priorities should be balanced;
 - whether the policy sets a standard or other requirement that is essential to achieving the wider vision and aspirations in the Local Plan;
 - in the case of site allocations, whether bringing the site forward is central to achieving the vision and aspirations of the Local Plan;
 - whether the Local Plan identifies the policy as being strategic.

¹ Paragraph 076 Reference ID: 41-076-20140306 <https://www.gov.uk/government/collections/planning-practice-guidance>

6. Policies have normally been classified as 'strategic' where they meet one or more of the criteria set out in the assessment tables, or respond to a strategic priority. In some circumstances site specific policies meet these criteria but would only be relevant where the sites in question fall within an area for which a neighbourhood plan is being prepared.
7. For clarity the following over-arching principles have also been adopted to classify policies as 'strategic':
 - Local Plan policies which cover the whole borough. These are intended to provide a basis for consistent decision making across the borough and as such it is considered necessary to identify these as 'strategic' policies.
 - Policies which allocate land and contribute to delivering future development in order to deliver the spatial strategy set out in the Core Strategy.

Schedule of strategic policies

8. As a result of the assessment a schedule of 'strategic' policies for the purposes of neighbourhood planning is set out below.
